### ABCs of Saving Money!

#### ACCOUNT

An account is a safe place at DFCU Financial where you can put the money you have saved. You can add money to your account to make it grow.

#### BUDGET

A budget is a plan you create to help you keep track of the money you save and control the money you spend.

#### CASH

Cash is money in any form, especially coins or dollar bill, that is immediately available. Many people bring their cash to DFCU Financial to put it in their savings account.

#### WISE SPENDING HABITS START EARLY

Any time and any age is a good time to start teaching your child about money. Here are a few simple areas to consider for financial responsibility.

#### WANTS VS. NEEDS

Show the difference between a want and a need. While they may "want" a new action figure or video game, they "need" coats and hats and gloves to stay warm. Show them how these are better for a family budget and keep you warm all winter long.

#### SAVING VS. SPENDING

It's up to you to show how to save and spend wisely. Go shopping and explain how to comparison-shop. Explain the difference between price and value. In addition, show them why your family saves money for the future and how to work toward a savings goal.

#### SHARE THE BUDGET

If you are comfortable with the idea, share the family budget. This is an amazing teaching opportunity. They'll see that cell phones, cable TV, and trips to the store add up quickly. Above all, share what you know about money. They might not get it at first, but the lessons you impart today will last a lifetime.
